Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application serial no. 10/664,749 filed September 18, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-12, 14-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowther (2,252,974). Lowther discloses a module for providing purified air to an internal combustion engine that does not use a throttle body, comprising: a housing having an inlet for receiving fresh air; a filter (27) for removing impurities from said fresh air to provide purified air, wherein said filter resides in said housing, at least one mounting member for attaching said module to said engine; and a plurality of runners extending between said housing and said at least one mounting member, wherein said runners direct said purified air to combustion chambers of said engine.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3747

Claims 3 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al. (3,111,937) in view of Lowther (2,252,974). Johnson et al discloses the V- shaped cylinder engine except an air filter. Lowther discloses the unthrottle engine with an air filter. It would have been obvious to one of ordinary skill in the art at the time of the invention to use the air filter of Lowther in the invention of Johnson et al. because an air filter is commonly used in all types of engines.
